Description

A rare and unusual object designed for export in the Meiji era to Japan:

a table bell representing a skeleton seated cross-legged under a parasol whose axis is decorated with a snake, a toad at its feet.

very beautiful brown patina and pretty lacquer on the bell decorated with red lacquer and green bamboo leaves.

you never come across this bell complete with all the elements, it's the first time I've had the set.

a very beautiful Japanese collectible bronze.

height

23 cm
