Description

Charming little oratory in walnut from the late 17th / early 18th century. It opens on the front with a four-lobed door. The flap opens onto a small storage box. This prie Dieu is in good used condition. It has undergone restorations (restored plinth and splices on the front legs) The lock is posterior, it is provided with its key and works. Many traces of old galleries of xylophages are present on the whole piece of furniture. They are very old and have in no way weakened the structure or the solidity of the oratory.
