Description

Here is a very nice little candlestick model. The base, octagonal shaped, has a bulge with a high border. Made in two parts, with a screw system, the barrel, straight in shape, is very slightly flared, and has an evacuation hole for the wax. Very good general condition. Unfortunately, the screw system has been modified, leaning on the original and maintained by a bolt under the base. Few wax marks, sold as found. Well indicated on my detailed pictures! European working, probably French, dating from the end of the 17th century, beginning of the 18th century, Circa 1700.

Dimensions: Height 13.5cm, base width 11cm
