### Description

Mechanical calculator by Ohdner (Sweden)

Model 24

Circa 1940

Nice marchant mechanical, hand-operated calculator.

It's a pinwheel-type machine that can add, subtract, multiply, and divide at the turn of a crank. (Well, many turns to multiply or divide.)

The calculator is in perfect working order.

The carriage, 0 resets etc. are fluid.

There are a few signs of use and one bakelite handle is missing, but the overall condition is very good (!).

### Dealer

**Cartellino**

Antiques, ethnical jewels, vintage clocks & watches, etc.

Mobile : +32 (0)475 557 480

34, Avenue Victor Rousseau

Bruxelles 1190

Manufacturer's sticker and Belgian reseller's sticker

Width: 33 cm (max)

Depth: 15 cm

Height: 12 cm

Weight: 5,4 kg

This justifies slightly higher shipping costs than usual...

Ohdner

The company was founded during nineteenth century by a Swedish, but had its factories in Russia (St Petersburg).

Nationalized in 1918 after the revolution, its founder brought production back to Sweden, where he continued to develop the company.

This model was created in 1940
