

## Two Bell Tower Clock Movements

4 500 EUR

Period : 17th century

Condition : En l'etat

Material : Wrought iron

### Description

Rare set of two bell tower movements, one 17th in wrought iron, the other 19th in brass. The 19th century flat brass movement bears the words "St Austreberte" on the small enamel dial. It is probably a production of the Roy house, a famous watchmaker of Swiss origin established since the beginning of the 19th century in Saint Austreberte near Rouen. It is complete with its elements, balance, fins (disassembled), weight. There seems to be some missing parts on the other wrought iron cage movement. Do not hesitate to contact me for any request for information.
