350 EUR

Period : 20th century

Condition : Etat d'usage

Material : Metal

Length : 12 cm

Diameter : 5,5 cm

Height : 22,5 cm

Description

Old Tibetan or Nepalese prayer wheel with inlaid stones to identify and finely worked metal. As for the condition, note wear and friction, scratches, small stains in places. The prayer wheel is composed of a cylinder rotating around a handle, covered with sacred or painted formulas. By spinning a prayer wheel, we release the positive energy accumulated in the mantras it contains. According to popular beliefs, the rotations of prayer wheels ward off evil spirits, illnesses and bad luck. The rotation symbolizes the cycle of rebirths and the movement of the sun. The photos are an integral part of the description.
