Description

Work of folk art, 6 old reaper's anvils on wooden base. The scythe or faux is a manual tool long used to mow grass or cereals. A reaper's anvil is a small, portable metal anvil that the reaper uses as a support when beating the edge of his scythe's blade when the sharpener is lost. when the scythe no longer cuts, it must be sharpened again and the anvil allows, among other things, to make the blade of the scythe sharp again.
