Description

Side piece of furniture with cut slope from the art deco period. The brown top contrasts and frames a molding with an old bronze patina. The shelves are enhanced by this finish on the double boudin edges (21 cm/27 cm) (h 33cm and 40 cm). We find the same line on the central upright with a slightly curved shape at the base. The base is skyscraper shaped on the front and on the rear base. The proportions, line and solid wood make this piece rare and functional. Possible delivery not included in the price.
