

Tighten The Greenhouses That Tighten

450 EUR

Period : 20th century

Condition : Très bon état

Material : Other

Width : 35cm

Height : 45cm

Depth : 5cm

Description

EXTRAORDINARY ingenuity... or how to invent educational material so that the child understands and visualizes how bird claws work... I keep manipulating what activates the ropes which, when bandaged, open the claws of this raptor leg fixed on a panel. It bears the distributor's mark, the whole thing is from the beginning of the 20th century, all original. Brilliant, rare and special.
