Description

we present to you this very particular and rare object, typical of the English tradition, the invention of the TOASTING CHEESE DISH dates back to 3/4 of the 18 EME, the English have always been very fond of toast, and particularly cheese toasts. The problem was to be able to keep the toasts warm, so that the cheese is always melting, this is why the handle of our TOASTING CHEESE DISH unscrews and allows hot water to be introduced, allowing optimal maintenance of the temperature, the lid can be ajar thanks to the small original chain. no restorations, no damage. dimensions (excluding handle): 27 X 20 CM GROSS WEIGHT: 940 GR
