

Louis XV Period Table

Description

Louis XV period table also called cabaret table. Very rare lines for this provincial piece of furniture with very emphasized curvatures (at the level of the curves of the legs), the work of the crosspieces on all sides and its overflowing top. Note that the original top is made of two woods, walnut and oak (see photo). A really interesting piece in my opinion.

1 300 EUR

Period : 18th century
