Description

A dagger with a bronze handle and a forged steel blade...

The blade is fluted...

It is fixed inside the handle...

Nice steel work...

There is like a punch (see photo) on the flat of the handle...

From the 19th century perhaps older...?!

I asked but I'm not sure...

In good condition, a little dirt and wear from use...

But really nothing serious...

Here too I'm announcing it FRENCH without being sure because I don't know much about this type of object...

Weight... 289 gr
