Description

Horse Tricycle. Toy dating from the end of the 19th century. This magnificent toy is designed in the shape of a horse. With an expressive head. Its body is made of carved and painted wood to represent the texture and color of an equine. The wheels are with metal-rimmed tires. The saddle is made of leather, the stirrups are made of iron. This tricycle is equipped with a pedal mechanism and functional wheels allowing a small child to move around while riding it. The axle support is made of openwork metal with scroll decoration. The iron handlebars and the handles are made of wood. Note the realistic details of this toy, including glass eyes, nostrils and a slightly open mouth, a tail made of real horsehair. A lot of charm and originality for this toy which can be used as a decorative element in a child's bedroom,
