Description

12 wine glasses from the Saint Louis crystal factory. This model is very close to the Tommy model (without the pearls in the upper part) created after the First World War in honor of the British soldiers in 1928. It is made of a so-called "doubled color" crystal, which consists of marrying before blowing a thin layer of colored crystal on the surface with the clear crystal inside. Historically, it comes in 8 colors: dark and light blue, dark green, chartreuse, flannel gray, red, amethyst and purple.
