Description

Large Faun with a Wineskin After Sabatino De Angelis (1838-).

Large bronze with a nuanced green patina in the manner of the antiques, this is the famous faun with a wineskin after Sabatino de Angelis (1838-).

a very beautiful large bronze dating from the first half of the 20th century with a green patina inspired by the green patinas of excavations and resting on Belgian granite.

our bronze is superb in terms of cast quality and a beautiful resumption of chiseling with particular care given to the patina while in nuances recalling a fashion of patinas carried out under art deco.
