Description

Black lacquered brass bedside, table or travel clock / alarm clock marked Jaeger-LeCoultre on the dial and on the back. The 8-day movement and the chime work perfectly. The dial has stick numerals. The base is square with steps. Some traces of use, fine scratches and small chips in the lacquer are visible in the photos. The back of the movement bears the number 002035 and "Jaeger Made in France". Circa 1960-70.
