

Cabochon And Faceted Garnet Ring In Yellow And Rose Gold

Description

Important ring in 14 KT yellow and pink gold (hallmarked with the scallop shell), decorated in its center with an elongated cabochon garnet of a beautiful characteristic deep red, surrounded by two rows of similar, faceted garnets.

Well-designed claws around the central cabochon punctuate its perimeter and respond to the numerous claws that visually contrast with the deep red of the stones on the two surrounding rows. The very domed central cabochon creates a balanced volume in relation to the large size of this ring. The material offers a deep and luminous red (note: the cabochon having a perfectly polished surface, the visible manifestations on its surface are only reflections of the environment, here exterior - trees in particular). The cleverly openwork setting has a curved finger entry to fit
