Description

Sublime vintage chandelier by Hans Kögl, designed in the 1970s, inspired by nature and the floral elegance of the calla lily. Its gold and silver metal structure delicately evokes the organic movement of leaves and flowers. The silver chalices are delicately enhanced with faceted Swarovski crystal stamens, bringing a subtle and refined sparkle to the whole. The arms of the chandelier, with curved and harmonious lines, support artificial resin candles, realistically imitating melting wax. This timeless lighting fixture will fit perfectly into a classic, bohemian or glamorous decoration, bringing a touch of elegance and poetry to any interior.
