Description

Small EMPIRE style console table in half-moon shape in solid mahogany, black marble top, resting on two ringed columns and two flat rear uprights. Half-moon base. Period: first part of the 20th century. Note a small lack at the level of the veneer of the base. Exceptionally, this model has a rounded front drawer with invisible handle. The mirror has a slight opacity. A very beautiful little piece of furniture, practical and decorative which will find its place easily.
