Description

Majestic Pair of Qing Dynasty Red Lacquered Wood Armchairs 19th Century. Appraised. -
Material: They are made of red lacquered wood, a traditional technique that gives a glossy and durable finish. Red lacquer is often associated with wealth and nobility in China. - Design: The armchairs have a curved design with S-shaped armrests, which is typical of Ming or Qing style chairs. The back is high and features carved decorative panels, often with floral or symbolic designs. - Details: The armrests are decorated with intricate carved designs, adding to the elegance and sophistication of the armchairs. The legs of the chairs are also carved, sometimes in the shape of a dragon's paw or other traditional design. - Seat: The seat is woven with natural materials, probably rattan or bamboo, which was

common to provide comfort while allowing some ventilation. - Function: These armchairs were probably used in formal or semi-formal settings, such as reception rooms or tea rooms, reflecting the social status of their owner. These armchairs are not only functional but also pieces of art that reflect the aesthetics and craftsmanship of the late 19th century.
