Description

Table lamp design model KUSHI, designer Alberto Saggia and Valerio Sommella
Apple-shaped
Diam. 33 x H 32 cm
Kushi is a collection of lamps in which two pure and antithetical elements coexist, both in their form and in their substance. Sobriety, purity, softness are the key words of this design! Thus, the metallic rod, rigid, cold and materialistic contrasts with the velvety softness of the curves of the diffuser in blown and engraved glass, coexisting in the same space, in a continuous and reciprocal relationship, to give life to a collection of lamps very simple in form but endowed with a strong personality.
