Description

Carved wooden watch holder from the Regency period. Lower part probably gilded or painted in Martin varnish originally, we can clearly see traces on the sides and at the back. The watch holder is surmounted by a seated bronze putto, the opening is done at the back by lifting a small iron latch, inside a hook to hang the watch. A spring mechanism on the door, perfectly functional (the protective leather is brittle and partly torn), it allows the watch to be placed on the front of the dial. The external diameter of the dial is 5.5 cm. Height 36 cm Base 21 cm x 6 cm Dial diameter 5.5 cm The watch on display is not part of the sale. > old restoration on the two rear feet (two consolidation grafts). Price not negotiable. Payment by check or bank transfer. Shipping costs colissimo France or Mondial
