Description

Eero Saarinen (1910-1961) & Knoll International
Pair of Tulip model chairs in white lacquered
fiberglass, swivel base in cast aluminum covered
with white Rilsan. Patties in the white sky.

Measures: 81 x 51 x 44 cm. The Tulip Chair was
designed by Eero Saarinen in 1955 and 1956 for
the Knoll Company of New York. It was
designed primarily as a chair to match the
complementary dining table. The chair has the
soft lines of modernism and has been
experimental with materials for its time. The
chair is considered a classic of industrial design.
The chair is often considered "Space Age" for its
futuristic use of curves and man-made materials,
Saarinen had hoped to produce the chair in one
piece entirely from fiberglass, but this material
was not able to support the base. and prototypes
